

CURRENT

Kick off thrilling FinTech startups and make exciting products work from scratch

We are looking for a **Rockstar** **UI/UX Developer** in Munich

It's time to change the way the world interacts with money. CURRENT creates ground-breaking fintech ventures with the best people bringing together subject matter expertise and technology.

What you are in for

You will work with successful serial entrepreneurs, very experienced technology experts, senior advisors as well as the smartest founders in Fintech within our ventures. Working with multiple ventures you'll create the "face" of next generation financial services as well as infrastructure and frameworks used across ventures. We strongly believe user/customer experience will play a key role in the transformation we are in.

Why you should join

To kick off thrilling FinTech startups, build the foundation and make exciting products work from scratch

To see yourself making the difference between a flop and a potential unicorn - every single day

To live your entrepreneurial mindset and see the growth of ventures on which you gave all your professional dedication

What you will be doing

YOU DESIGN and IMPLEMENT the UX of prototypes and solutions in collaboration with expert UX designers

YOU INTRODUCE and EVOLVE state of the art UI technology into our tech stack for ventures

YOU CODE, iterate and deliver to kick start newly founded ventures

YOU TAKE RESPONSIBILITY within a team of highly skilled experts, with love for details and an eye for the bigger picture

YOU GROW by proving your skill, using state of the art tools, experiencing business and learning something new every day

You are responsible for

- Visually appealing user experience - in idea prototyping and productive solutions
- Contributing the first screens of new start up, and getting the first version into production
- A compelling, simple and ready to use UI/UX package for our startups

Your key goals and objectives

- Contribute delivering attractive prototypes fast and working solutions when needed
- Kick start new ventures with an effective UI tech stack
- To know the server-side of things to an extend that allows you a level of independency

Your background

- UI / Frontend Development - Multi-year expertise in WEB-UI technologies as well as experience in the mobile APP space (e.g. React, Selenium, Micorservices)
- "Feel" for user experience - Experience with prototyping tools (e.g. Sketch) and some UX examples to show from past experience
- Agility - Strong willingness to deliver, always hands-on.
In the team, with the team and for the team.

Join us in the
fintech revolution!
